

WebJunction Ohio is an online community for library staff to learn, share ideas and work together to improve services in all types of libraries throughout the state. WebJunction Ohio members are encouraged to participate in social networking, continuing education trainings and courses, and contribute content, articles, and resources for downloading (i.e. handouts, PowerPoints...). All you need to do is register with an Ohio affiliated membership. It's easy to do and it's free!

There are valuable resources throughout WebJunction Ohio, including a vast catalog of self-paced courses available at no charge to Ohio affiliated members. WebJunction Central brings together a wide range of resources and information available to all members. The WebJunction Competency Index can be found under the Competencies tab on the Course Catalog page. The competencies help serve as a pathfinder to courses and content that address knowledge, skills, and abilities associated with specific areas of librarianship.

A Service
of the State
Library of Ohio

The Ohio Center is where you will find content specific to Ohio including E-Rate, Ohio Summer Reading Program, and Choose to Read Ohio.
